 Absoluta jam & edita Bibliographia mea Iuridica & Politica Novissima ejusque Conspectu primo, alteram modo Medicam & Physicam simillimè adornatam, edere aggredior. Quemadmodum vero illa Legum Statutoribus ac Politicis non displicuit, sic hac quam modo edo, Natura Mystis minus displicituram confido. Si enim ullum à renatis literis seculum illuxit, quo Studia Practica ad usum vitæ humane conducentia puta Medicina ac Mathematica, efflorescunt, absque dubio est hocce in quo vivimus. Quid in Medicina, ejusque auxiliante Sorore Physica hætenus ab eruditis Europa hinc inde tentatum, scriptum, ex decursu hujus Bibliographiæ Medicæ & Physicæ Novissimæ, cujus modo itidem Conspectum primum Tibi exhibeo, sat superque patebit. In qua quid à singulis aut observatum aut typis novissi-

vissimè editum sit , adjumento Indicis
Harmonici , quem adjunxi facillimè
perspicere poteris. Inque enarrandis
singulorum præsertim Neotericorum
Observationibus aliquanto prolixius
fuissem , ni illud alio curioso cuidam
operi , de quo in fine hujus præfationis
facio mentionem , reservassem ; quare
digito solummodo eas indicasse , ubinam
pleniorẽ cognitionem ipsarum haurire
cuivis liceat , hac vice sufficere putavi.
Si qua hujus Bibliographia Conspectus
secundus aliquando prodierit , ut amici
ominari videntur , defectus hosce si
tanti videbuntur facile supplebo. In-
terim fave meis studiis & Bibliogra-
phiam meam Mathematicam ut &
